

GT1 Self-Credentialing Kiosk

SAFE, SECURE AND AFFORDABLE SELF-CREDENTIALING KIOSK

Janam's GT1 self-credentialing kiosk is a super-affordable solution for contactless access control and is designed to deliver best-in-class experiences to hospitals, retail establishments, restaurants, office buildings, hotels, schools, arenas and virtually any organization that wants to verify usually private information from their patrons, customers, staff and guests.

Available in countertop and wall-mounted formats, GT1 is equipped with the most advanced data capture technology to read barcodes, QR codes and passes stored in a mobile wallet. With support for the most advanced tap-and-go features of Apple Wallet and Google Pay, GT1 eliminates the need for users to unlock their phone and scroll through their digital wallet to find the right pass. Integrated proximity-based NFC technology automatically pulls the appropriate pass, enabling businesses to rapidly verify ticket and check-in information, loyalty cards, employee ID, healthcare coverage and other business-critical information.

GT1 Self-Credentialing Kiosk

GT1 also helps businesses comply with state and local COVID-19 testing and vaccination requirements with the ability to securely read both paper and digital health credentials. GT1 supports most digital health passes including VaxScan from Soter Technologies, FOBI CheckVax, Good Health Pass, IBM Digital Health Pass, SMART Health Card, EU Digital COVID Certificate and other government-compliant digital vaccination verification apps.

"PLUG-AND-PLAY"

Transforms an XT2+ or XT3 handheld into a fully-automated, self-service scanning solution

VERSATILE DESIGN

Compact and portable; fits most spaces in countertop or wall-mounted format

SELF-SERVICE

Visitors self-credential, enabling staff to perform other tasks

NO TOUCH

Reduces the spread of contagions via zero contact and safe distancing

INSTANT NOTIFICATIONS

Attention-grabbing LED lights and audio confirm credential status at a distance

NFC "TAP-AND-GO"

Supports advanced protocols for both Apple Wallet and Google Pay in the same device

ROBUST DATA CAPTURE

Reads all 1D/2D printed and digital barcodes, RFID/NFC-enabled tickets and wristbands

SUSTAINED CONNECTIVITY

Maintains existing network connection to backend software solution for continued stability

SOFTWARE INTEGRATION

Integrates with virtually all third-party software
